

# FINAL PROJECT PROPOSAL

**Project Name:** SkillUp Academy

**Submission Deadline:** 21/11/2025

---

## 1. Project Description

Our project is a **Specialized Educational E-Platform** focused on **Skills Development**, covering both Hard Skills (technical) and Soft Skills (personal/professional). The platform aims to provide practical, interactive content centered around the actual application of in-demand skills in the job market.

**Core Focus:** To offer curated learning paths designed to help users master specific skills through micro-learning modules, practical challenges, and a continuous assessment system to track student progress toward mastery.

**Architecture:** The project is entirely built using the **N-Tier Architecture** pattern to ensure strict **Separation of Concerns**, which guarantees scalability, maintainability, and testability.

## 2. Group Members & Roles

**Team Leader:** Mohamed Haitham Afify

Team Member	Core Role	Completed & Current Tasks	Pending & Specific Tasks
<b>Mohamed Haitham Afifi</b>	Content Configuration & Business Rules Lead	CRUD for Course Category, SubCategory, and Course Review.	<b>Identity:</b> Setup Admin classes and user management. <b>API:</b> Build Endpoints for Categories and Reviews.
<b>Mohamed Sabry Ouda</b>	Financial & Assessment Systems Lead	CRUD for Subscription Plan, Subscription, and Exam Attempt.	<b>Payment:</b> Build Instructor Payouts functionality. <b>API:</b> Build Endpoints for Subscriptions and Plans.
<b>Abdullah Mohamed Goudah</b>	Course Structure & Content Flow Lead	CRUD for Course, Course Lesson, and Lesson.	<b>Identity:</b> Setup Student classes and Registration/Login functionality. <b>API:</b> Build Endpoints for Course and Lesson.
<b>Mahmoud Mohamed Ahmed Hussein</b>	Exam & Question Logic Lead	CRUD for Exam, Question, and Answer.	<b>Identity:</b> Setup Teacher classes and profile management. <b>API:</b> Build Endpoints for Exam and Question.

**General Note:** All members collaborated on the initial database schema design and standardization during Phase 1.

### 3. Objectives

Objective	Description	Metrics
<b>1. Launch Minimum Viable Product (MVP)</b>	Build a functional platform containing all core features and security functions (Identity) to enable the basic student and instructor life cycle.	Achieve <b>100%</b> on KPI #1 (System Functionality Completion Rate) for defined core features.
<b>2. Ensure N-Tier Architecture Compliance</b>	Strictly apply the N-Tier Architecture pattern to separate the Presentation/API, Business/Service, and Data Access layers.	Achieve <b>100%</b> adherence to the rule: no direct DbContext calls outside the <b>DAL</b> layer (KPI #2).
<b>3. Provide Secure &amp; Role-Based Access (Identity)</b>	Fully integrate ASP.NET Identity Framework to distinguish the three roles (Student, Teacher, Admin) and provide secure, restricted access for each.	Achieve <b>100%</b> success in security tests for registration, login, and role-based authorization.
<b>4. Ensure Code Quality &amp; Scalability</b>	Adhere to engineering standards, including layered architecture and Dependency Injection, to ensure clean, maintainable, and scalable code.	Achieve a minimum of <b>60%</b> Unit Test Coverage for the Business Logic layer.

#### 4. Tools & Technologies

Category	Technology or Tool	Purpose
<b>Primary Language</b>	C# (Latest Version)	Full server-side development and business logic implementation.
<b>Primary Framework (Backend)</b>	ASP.NET Core MVC	Building the Presentation Layer, handling HTTP requests, and providing MVC/REST Endpoints.
<b>Architecture Pattern</b>	<b>N-Tier Architecture</b>	Strict separation between Application Layers (Presentation, Business Logic, Data Access).
<b>Database</b>	SQL Server	Primary Relational Database Management System.
<b>Data Management (ORM)</b>	Entity Framework Core (EF Core)	Database interaction, querying, and schema management via Migrations.
<b>Identity &amp; Security</b>	ASP.NET Core Identity	User management, roles (Student, Teacher, Admin), and authentication.
<b>Frontend (Current)</b>	HTML5, CSS3, Bootstrap, JavaScript	Building the user interfaces (Views) using the traditional MVC pattern.
<b>Coding Principle</b>	Dependency Injection (DI)	Ensuring code testability, maintainability, and quality.
<b>Version Control</b>	Git & GitHub	Code management, change tracking, and team collaboration.

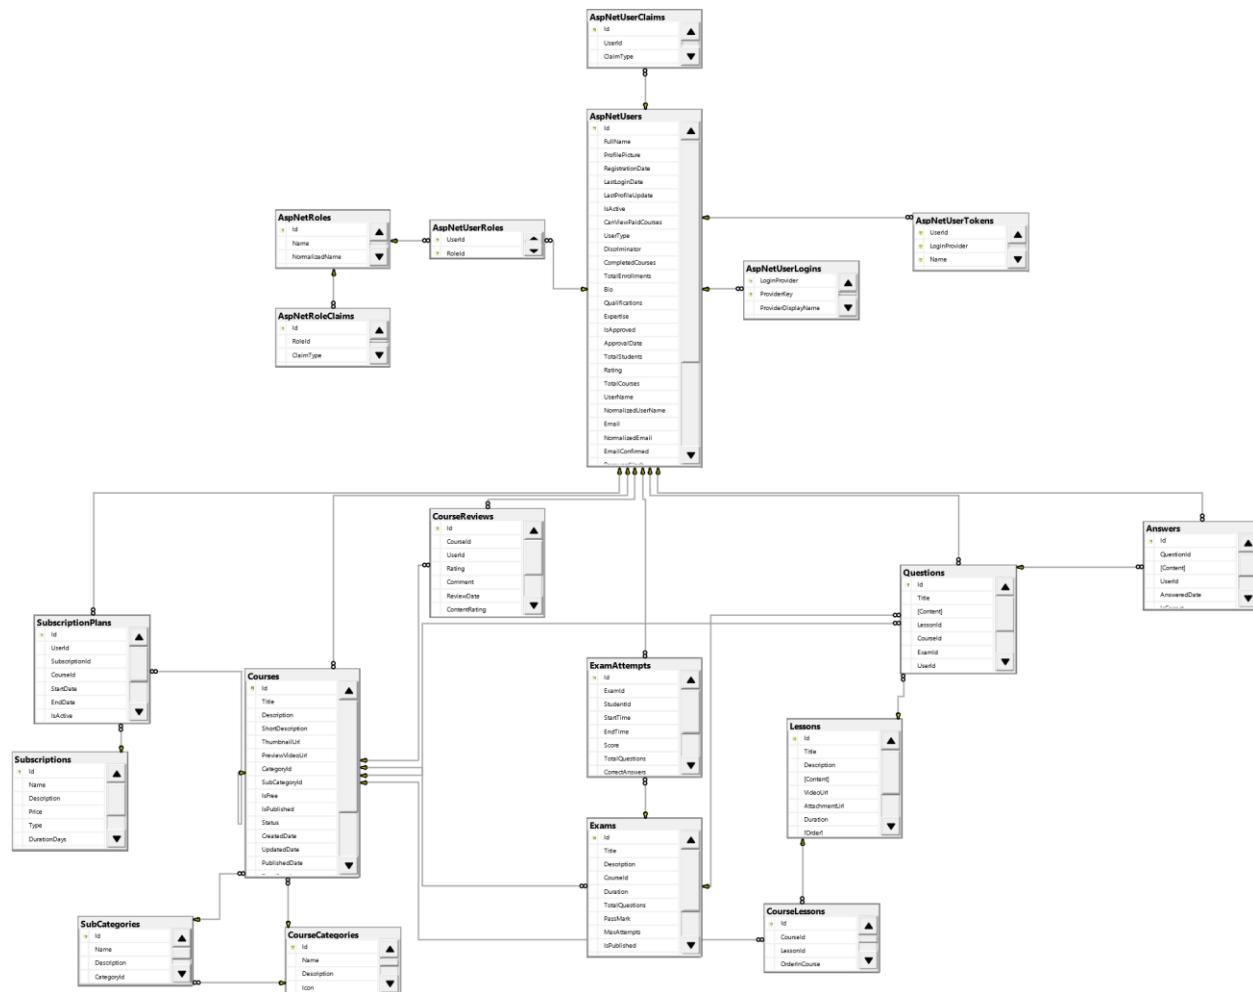

## 5. Milestones & Deadlines

Milestone	Covered Tasks	Status	Deadline
<b>Phase 1: Foundation &amp; Design</b>	Schema design, Initial Migrations, and N-Tier structure definition.	Completed	7/10/2025
<b>Phase 2: Core CRUD Functionality</b>	Development of all Entities, Controllers, and Views for basic CRUD operations.	Completed	17/10/2025
<b>Phase 3: Security &amp; Architectural Integration (Identity &amp; DI)</b>	Implement ASP.NET Identity, Registration/Login, strict Dependency Injection, and basic Dashboards.	In Progress	7/11/2025
<b>Phase 4: Financial Systems &amp; Final Review &amp; Testing</b>	Develop Instructor Payment logic & Test coverage, performance optimization, bug fixing, and final documentation.	Plan	21/11/2025

## 6. Key Performance Indicators (KPIs)

KPI	What it Measures	Customization for the Educational Platform Project
<b>1. System Functionality Completion Rate</b>	Percentage of planned MVP features successfully implemented and tested.	<b>Customization:</b> We define <b>14 Core Features</b> for the system. The KPI is calculated as: . <b>Goal:</b> Achieve <b>100%</b> completion rate for all core MVP functionalities.
<b>2. Code Quality &amp; Architecture Compliance Score</b>	Adherence to N-Tier structure, clean coding, and Dependency Injection usage.	<b>Customization:</b> Measured by three factors: 1. <b>Layer Separation:</b> Ensuring no direct DbContext calls occur outside the <b>DAL</b> layer. 2. <b>Architecture:</b> Strict usage of Dependency Injection for all services. 3. <b>Unit Test Coverage:</b> Achieving a minimum of <b>60%</b> Unit Test Coverage for the Business Logic layer.
<b>3. Testing &amp; Reliability Rate</b>	Percentage of test cases passed successfully, reflecting system stability.	<b>Customization:</b> <b>30 main test cases</b> are defined (including student registration, course creation, subscription payment). The KPI is calculated as: . <b>Goal:</b> Achieve a success rate of at least <b>95%</b> in integration testing before final submission.
<b>4. Performance &amp; Efficiency Rate</b>	Measurement of system responsiveness, particularly for critical functions and the API.	<b>1. Database Queries:</b> No single query in the Repositories should take longer than <b>150ms</b> to execute.
<b>5. Error or Defect Rate</b>	Tracking the number of critical issues discovered during testing relative to the testing volume.	<b>Customization:</b> Measured by the number of <b>Critical/High Priority</b> bugs discovered. <b>Goal:</b> The critical defect rate must not exceed <b>1 bug per 50 test cases</b> executed, with all critical defects resolved before the final deadline.

## Database Design:

## Main Database Sections

The schema is divided into two main areas:

- Identity Tables:** Core tables from ASP.NET Identity for managing users, roles, and security.
- E-Learning/Content Tables:** Custom tables for managing courses, lessons, subscriptions, and assessments.

## Identity Tables (User Management and Security)

These tables handle authentication, authorization, and user profiles, inherited from the standard ASP.NET Identity framework.

<b>Class (Table)</b>	<b>Function</b>	<b>Key Attributes (Columns)</b>
<b>AspNetUsers</b>	Stores all registered user accounts in the system.	Id (PK), UserName, Email, PasswordHash (Encrypted password), EmailConfirmed. Custom columns: FullName, DOB (Date of Birth), Bio, Qualifications, JoinedDate, CoursesTaught, etc.
<b>AspNetUserRoles</b>	A many-to-many junction table linking Users to Roles.	UserId (FK to AspNetUsers), RoleId (FK to AspNetRoles).
<b>AspNetRoles</b>	Defines the roles (e.g., Admin, Instructor, Student) available for users.	Id (PK), Name (Role name).
<b>AspNetUserClaims</b>	Stores extra pieces of information or claims directly associated with a User.	Id, UserId (FK), ClaimType, ClaimValue.
<b>AspNetRoleClaims</b>	Stores claims associated with a Role. Users in that role inherit these claims.	Id, RoleId (FK), ClaimType, ClaimValue.
<b>AspNetUserLogins</b>	Stores data for users who log in via external providers (e.g., Google, Facebook).	LoginProvider, ProviderKey, UserId (FK).
<b>AspNetUserTokens</b>	Stores security tokens for specific functions like password resets or two-factor authentication.	UserId (FK), Name, Value.

## 2-E-Learning Tables (Content and Course Management)

These tables define the structure of the educational content and user interaction with it.

<b>Class (Table)</b>	<b>Function</b>	<b>Key Attributes (Columns)</b>
<b>Courses</b>	Stores information about the main courses offered.	Id (PK), Title, Description, Price, InstructorId (FK to AspNetUsers), CategoryID (FK to CourseCategories), Duration, PublishDate.
<b>CourseCategories</b>	Defines the major categories for courses (e.g., Programming, Design).	Id, Name, Description, Icon.
<b>SubCategories</b>	Stores sub-categories related to the main CourseCategories.	Id, Name, Description, CategoryID (FK).
<b>Lessons</b>	Represents the individual teaching units or lessons within a Course.	Id, Title, Content, VideoURL, Duration, CourseId (FK to Courses).
<b>Questions</b>	Stores questions that can be part of a Lesson or an Exam.	Id, Title, Content (Question text), LessonId (FK), ExamId (FK).
<b>Answers</b>	Stores the answers/replies to the Questions (used for Q&A or discussion, not for exams).	Id, Content (Answer text), QuestionId (FK), AnsweredDate.
<b>Exams</b>	Defines exams or quizzes associated with a course.	Id, Title, Description, CourseId (FK), PassMark, TotalQuestions, PublishedDate.
<b>ExamAnswers</b>	Records a user's individual answers to an Exam's questions.	Id, ExamId (FK), UserId (FK), QuestionId (FK), UserAnswer, IsCorrect.
<b>CourseReviews</b>	Stores user ratings and reviews for courses.	Id, CourseId (FK), UserId (FK), Rating (e.g., out of 5), ReviewText, ReviewDate.
<b>CourseEnrollments</b>	Tracks which Users are enrolled in which Courses.	Id, UserId (FK), CourseId (FK), EnrollmentDate, CompletionDate, Status.
<b>SubscriptionPlans</b>	Defines the various subscription plans (e.g., Gold, Silver) if the system is subscription-based.	Id, Name, Description, Price, Duration.
<b>Subscriptions</b>	Tracks a User's active subscription to a specific plan.	Id, UserId (FK), PlanId (FK), StartDate, EndDate, IsActive.

## UI/UX: Home Page

The screenshot displays the UI/UX of the Bedaya platform's home page. At the top, there is a navigation bar with the Bedaya logo, a profile icon, and a logout button. Below the navigation is a large blue banner with the text "Join Hundreds of Thousands of Creators Now". A subtext below it encourages users to start their educational journey today. Two buttons are present: "Subscribe Now" and "Browse Courses". A search bar with a placeholder "Search for a course, topic, or instructor..." and a red "Search" button are also visible. Below the banner, four statistics are displayed in boxes: 442,803 Arabic Learners, 400+ Training Courses, 211,474 Certificates Issued, and 52,481,006 Minutes Watched. The main content area features a section titled "Why Choose Bedaya Platform?" with four reasons: "Thousands of Courses", "Professional Instructors", "Fully Flexible", and "Accredited Certificates". Each reason has an associated icon and a brief description. At the bottom, there is a "Categories" section with a subtext "Explore a wide range of educational fields" and a grid of category cards.

### Why Choose Bedaya Platform?

We provide you with a unique learning experience that combines quality and flexibility

**Thousands of Courses**  
Diverse courses in various fields suitable for all levels

**Professional Instructors**  
Learn from the best instructors and experts in their fields

**Fully Flexible**  
Study anytime, anywhere that suits you

**Accredited Certificates**  
Get accredited certificates upon completion of courses

## Admin:

## Teacher:

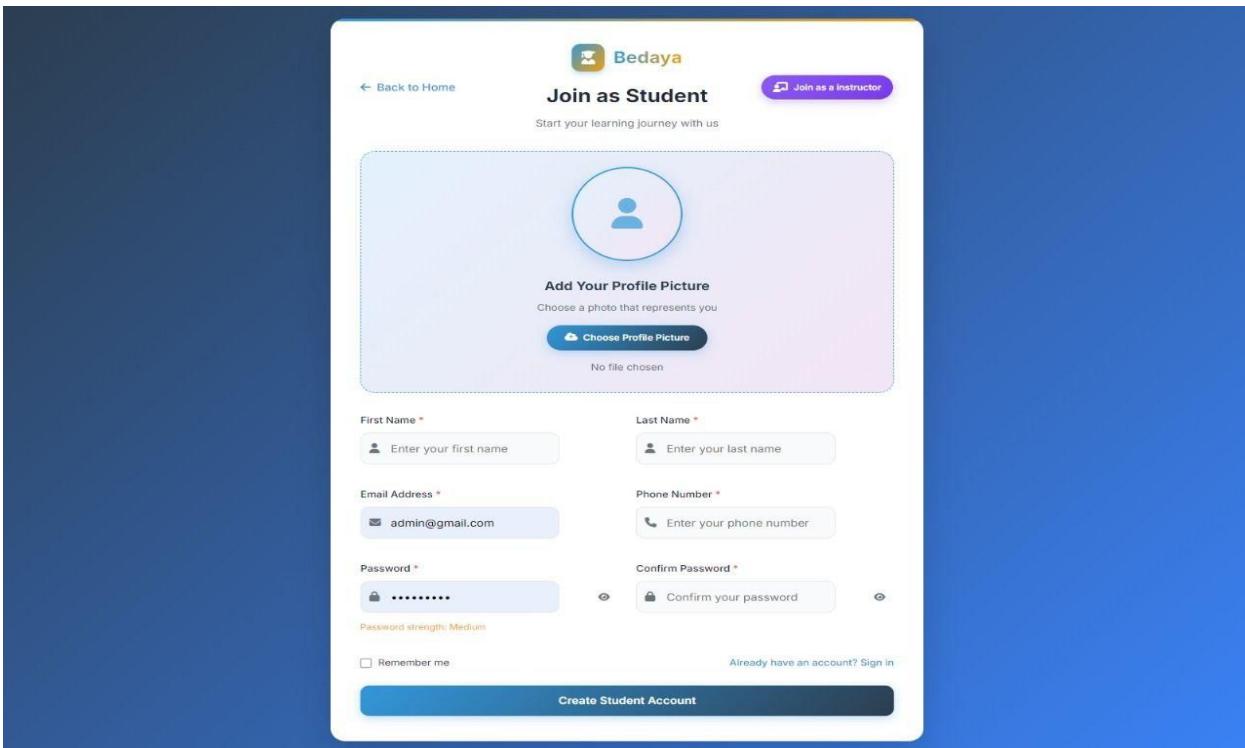

The screenshot shows the "Become an Instructor" form on the Bedaya platform. At the top, there's a "Back to Home" button and the Bedaya logo. The main heading is "Become an Instructor" with the subtext "Join our community of expert educators." Below this is a large input field for "Add Your Profile Picture" with a camera icon, which currently says "No file chosen". There are fields for "First Name" and "Last Name", both with placeholder text "Enter your first name" and "Enter your last name". The "Email Address" field contains "admin@gmail.com". The "Phone Number" field has the placeholder "Enter your phone number". A "Bio" section with a placeholder "Tell us about yourself and your teaching experience..." follows. Below that are sections for "Area of Expertise" (with placeholder "e.g., Web Development, Data") and "Qualifications" (with placeholder "e.g., PhD, Certifications"). The "Password" field shows a masked password "\*\*\*\*\*" and a strength indicator "Medium". The "Confirm Password" field has the placeholder "Confirm your password". A "Remember me" checkbox is present, along with a "Create Instructor Account" button. A link "Already have an account? Sign in" is located at the bottom right.

The screenshot shows the Teacher Dashboard on the Bedaya platform. On the left, a sidebar lists navigation options: Teacher Dashboard, Dashboard (selected), My Courses, Students, Analytics, Messages (with 3 notifications), Settings, and Logout. The main area features a purple header with the welcome message "Welcome back, adaaaafdsfasfd sdfghnm,!". Below it are buttons for "Create New Course" and "View Analytics". To the right is a circular profile icon. Four summary cards are displayed: "1 Total Courses", "0 Total Students", "4.8 Average Rating", and "85% Completion Rate". A "Quick Actions" section includes a "+ New Course" button and a "View All" link. The "My Courses" section shows a card for a course titled "dfsafsd" with a "Published" status. The "Recent Activity" section lists four items with timestamps: "5 new students enrolled in 'Web Development'" (2 hours ago), "New comment on 'Machine Learning Basics'" (5 hours ago), "Your course received a 5-star rating" (1 day ago), and "3 students completed 'UX/UI Design' course" (2 days ago).

## Student:

The Bedaya Student Dashboard Overview page. On the left is a sidebar with navigation links: Dashboard, My Learning (My Courses, My Exams), Progress &amp; Results (Progress Report, Certificates), Subscription &amp; Payments (My Subscription, Payment History, Upgrade Plan). The main dashboard features a search bar at the top. Below it is a "Student Dashboard Overview" section with four cards: "ENROLLED COURSES" (4), "COMPLETED COURSES" (2), "OVERALL PROGRESS" (80%), and "CERTIFICATES EARNED" (2). To the right of these are two larger sections: "My Learning Progress" (a line graph showing progress from Jan to Nov) and "My Course Interests" (a donut chart divided into Development (blue), Marketing (green), and Languages (cyan)). At the bottom left is a "Student Progress &amp; Tasks" section with two progress bars: "Course Completion Rate" (75%) and "Assignments Completed" (90%). To the right is a "Quick Actions" section with a list of links: Continue Last Course, View My Certificates, Edit My Profile, Contact Support. The footer contains the copyright notice "Copyright © Your Website 2026".
